Dear Phil and Phil,

My guys are working on the action item list from last week's meeting. Here is a submittal to Tammy Ash.

I will send the Agreements and Action Item list from the meeting on Thursday.

Regards,

Bob Piniewski

Subject: Patrick Bayou Superfund Site - State and Federal listed species for Harris County, TX

Tammy,

Based on our discussion on July 16th, 2008, we had agreed to provide you with a list of both State and Federal listed threatened, endangered, and rare species for Harris County, TX. Please find three documents attached. The two .pdf downloads from the TWPD web site with the species status as of June 2008 and key code. The second is a .doc in tabular format of these species with some additional habitat, foraging, and residency status information.

We had agreed in principle during our meeting that the Brown Pelican (*Pelecanus occidentalis*) was the only potentially occurring listed species for which a quantitative COPC screening would be necessary; pending final review. We had agreed to provide this information to assist your final evaluation of this agreement.

We are currently evaluating which wildlife species would be an appropriate surrogate for the Brown Pelican (e.g. cormorant) and associated exposure parameters (e.g. body weight, etc.). We would like to provide this information for your review and input prior to the next response to comments submittal so we can provide the results of this analysis to the technical team in that document. Would this be OK with you?

Please don't hesitate to contact me if you need additional information or would like to discuss this in more detail.

Thanks,
Jason
